

FUNDAMENTALS IN IMMUNOLOGY AND INFECTION

November 04 - 22, 2024 ::: 16th Edition

Day	Start	End	Theme
04-11-2024	09:00	09:30	Course presentation
	09:30	11:00	Introduction to the immune system
	11:00	12:30	Pathogen Recognition
	14:00	15:30	Cellular mediators of the innate response and anti-microbial mechanisms
05-11-2024	09:00	10:30	Methods and Models in Immunology and Infection
	11:00	12:30	Humoral mediators of the innate response
	14:00	15:30	Genetic determinants of susceptibility to infection
	16:00	17:30	Cell death and autophagy in infection and disease
07-11-2024	09:00	10:30	Journal club
	11:00	12:30	Journal club
	14:00	16:00	T and B cell ontogeny
08-11-2024	09:00	12:00	Practical session I: Basic techniques in microbiology and immunology
	14:00	17:00	Practical session II: Kinetics of the inflammatory response
11-11-2024	09:00	10:30	The bridge between innate and acquired immunity
	11:00	12:30	Effector T cell and B cell differentiation and response
	14:00	15:30	Immunomodulation
	16:00	17:30	Immunometabolism
12-11-2024	09:00	10:30	Clinical applications of immunotherapy in cancer and chronic inflammatory/autoimmune diseases
	11:00	12:30	Translation in immunology and infectious diseases
13-11-2024	09:00	10:30	Journal club
	11:00	12:30	Journal club
	14:00	15:30	Journal club
14-11-2024	09:00	10:30	Practical session III: Cell analysis by flow cytometry
	14:00	17:00	Practical session IV: <i>Ex-vivo</i> models in immunology
18-11-2024	14:00	16:00	Written examination
22-11-2024	09:00	10:30	Essay presentation
	11:00	12:30	Essay presentation
	14:00	15:30	Essay presentation
