ADVANCED THERAPEUTIC ENDOSCOPY - EMR & ESD HANDS-ON TRAINING WITH LIVE PORCINE MODELS

COORDINATED BY: Carla Rolanda, Arjun Koch, Mário Dinis-Ribeiro,
Marco Bruno, Jorge Correia-Pinto

This course is part of an announced series of hands-on workshops in ESD and EMR co-organized by EAGEN and ESGE in live porcine model, which are taking place in the training centers of the Erasmus School of Endoscopy in Rotterdam, the Netherlands and in the Life and Health Sciences Research Institute - School of Health Sciences, University of Minho in Braga, Portugal.

ESD and EMR techniques are increasingly practiced in Europe with a growing need for intensive individual training. We have developed a training program to master endoscopic mucosal resections and submucosal dissections in a realistic setting using a live porcine model. The management of potential complications such as bleeding and perforation will be taught under guidance of renowned experts in the field. We hope that this unique workshop will serve the need for advanced training in this developing area of interventional endoscopy and look forward to welcoming you!

TARGET GROUP:
Gastroenterologists

SCIENTIFIC SPONSOR

APRIL 2015 MONDAY, 27

MORNING	Registration Welcoming remarks Lecture 1: EMR vs ESD in the Esophagus Lecture 2: ESD in early gastric cancer Lecture 3: ESD in the colon Lecture 4: Complication management Lecture 5: Pathology - management of the resection specimen and histological assessment Lecture 6: In discussion - FU after resection Lecture 7: Electrosurgery – optimal use of high frequency current Live demonstrations by the experts
AFTERNOON	Hands-on training session I Dinner: participants & faculty

TUESDAY, 28

MORNING	Welcome back, reflection on the first day and discussion Hands-on training session II
AFTERNOON	Hands-on training session III Evaluation and closure remarks
