

SEPTEMBER 10-11, 2015
(5TH EDITION)

PEDIATRIC ENDOSCOPY

COORDINATED BY: Henedina Antunes, Carla Rolanda, Jorge Correia-Pinto

This hands-on course focuses on the role of endoscopy in the diagnosis and treatment of a wide variety of GI disorders. It aims to provide residents in pediatric gastroenterology and practicing GI endoscopists an update on current advances, with a comprehensive description of the endoscopic techniques, including hands-on training sessions in pigs. The faculty members are nationally and internationally recognized experts in the field of diagnosis and therapeutic endoscopy.

TARGET GROUP:
Pediatricians; Pediatric Gastroenterologists
