OCTOBER 1-2, 2015
(8TH EDITION)

THERAPEUTIC ENDOSCOPY

COORDINATED BY: **Carla Rolanda, Jorge Correia-Pinto**

This course focuses the role of endoscopy in diagnosis and treatment of a wide variety of GI disorders, and aims to provide residents in gastroenterology, practicing GI endoscopists and other interested health professionals an update on current advances, with a comprehensive description of some emergent endoscopic techniques.

During the 2 days, the work will be divided in introductory sessions with lectures and video presentations by renowned experts, followed by laboratory hands-on training in live tissue (pig model). The limited number of participants provides interactive and proficous discussions between the participants and the experts.
